

NordOil Group — Supply Chain Briefing

Europe · Middle East · Asia | Q2 2026

Corporate Structure & Trading

NordOil Group, domiciled in Rotterdam, Netherlands, controls two core subsidiaries: NordOil Exploration AS, registered in Oslo, Norway, which holds and operates the Balder Extension, Alvheim, and Grane fields on the Norwegian Continental Shelf under licenses issued by the Norwegian Ministry of Petroleum and Energy; and NordOil Trading BV, registered in Geneva, Switzerland, which holds title to all lifted cargoes and acts as the named seller across all transactions. NordOil Trading BV maintains ISDA master agreements with ABN AMRO, BNP Paribas, ING Bank, and Commerzbank to finance cargo purchases, and hedges Brent price exposure via the Intercontinental Exchange.

Marine Transport

Cargoes load at the Sture terminal in Hordaland, Norway, and are carried under a time-charter agreement between NordOil Group and Nordic Tankers A/S of Copenhagen across four Suezmax vessels — MT Stavanger Spirit, MT Oslo Star, MT Bergen Voyager, and MT Trondheim Falcon — each classed by DNV SE and flagged in the Marshall Islands. Voyages to the Arabian Gulf transit the Suez Canal, where the Suez Canal Authority levies per-voyage dues and acts as a critical chokepoint operator. Southeast Asia voyages proceed via the Strait of Malacca.

Middle East Offtake

The principal Middle East counterparty is Khaleeji Refining Company (KRC), a joint venture between ADNOC (51%) and NordOil Group (49%), incorporated in Abu Dhabi, UAE. KRC operates the Ruwais West refinery and receives approximately 80,000 bpd of Oseberg Blend from NordOil Trading BV under a five-year offtake agreement. Vessels discharge at Ruwais Marine Terminal, managed by Abu Dhabi Ports Company (ADPC); SGS Gulf Ltd. issues the inspection certificate upon which title transfers. Royal Vopak NV, through Vopak Terminals Fujairah BV, operates a secondary storage hub leased by NordOil at Fujairah, connected by subsea pipeline to ENOC's jetty infrastructure.

Asia Offtake

In Asia, Sinopec Zhoushan Petrochemical Co., Ltd. — a subsidiary of China Petroleum and Chemical Corporation (Sinopec) — receives roughly 40,000 bpd at the Yongzhou deepwater berth in Zhoushan, China. Sinotrans Shipping Ltd. provides port agency services and coordinates with the General Administration of Customs of China. A secondary destination is the Singapore Petroleum Company (SPC) refinery on Jurong Island, a subsidiary of PetroChina International (Singapore) Pte. Ltd., which purchases cargoes on a delivered ex-ship basis.

Finance, Compliance & Insurance

Trade finance per cargo is structured as a documentary letter of credit issued by Standard Chartered Bank (Dubai branch), confirmed by ABN AMRO Bank NV in Europe. Regulatory oversight is layered: the Petroleum Safety Authority Norway (PSA) audits upstream safety; the Dutch Authority for Financial Markets (AFM) and ESMA supervise trading under EMIR; and OFAC, OFSI, and the EU Consolidated Sanctions List govern vessel and counterparty screening. P&I insurance is carried with the UK P&I Club; cargo insurance is placed through AON Risk Solutions on the Lloyd's of London market.
